WELCOME TO PRO-LINK -

THE PROFESSIONAL LINK TO A CLEANER ENVIRONMENT.

We offer a comprehensive approach to cleaning: From an extensive selection of innovative and high-quality products to superior training and service. We work with you to ensure the correct product selection and the correct cleaning procedures are used by your employees. The end result is consistently cleaner facilities and lower total costs.

The Pro-Link brand is built on high-quality products that use the latest technologies to deliver better cleaning, increased productivity and improved worker safety. In addition, we feature other popular branded products that have consistently proven to be best in the industry.

Pro-Link's commitment to superior training and service is designed to help you achieve your sanitation goals safely, on time and cost-efficiently. Our team of experienced cleaning consultants is constantly educated in the latest industry trends, products and services. This professional team can evaluate your current maintenance program, recommend improvements in procedures and supplies and provide local and national technical support and trouble-shooting - all tailored to your needs. We also provide local in-service training seminars on industry trends, problem-solving and current workplace topics and concerns. On-site product demonstrations are available before and after you buy, to help ensure correct applications and usage.

To experience the value of our team of professional cleaning consultants in your own facility, call us at the phone number listed on the back cover of this catalog.

GREEN CLEANING

CREATE A SUSTAINABLE GREEN ENVIRONMENT

CHOOSE PRO-LINK GREEN!

DO GREEN PRODUCTS REALLY WORK?

Yes! Today's products are both effective and cost competitive. But to reap the most benefits and significantly improve your maintenance operation from a health, environmental and cost standpoint, you need to add effective cleaning techniques and training along with using the right green products. Pro-Link can help get you there.

WELCOME TO PRO-LINK GREEN

Pro-Link Green is not simply a line of products. It is a complete program designed to assist you in realizing the enormous benefits that are available with green cleaning. We want to help you take full advantage of the health benefits, productivity, reduced liability, cost savings and the improved community relations that this program can generate. Green cleaning means products and processes that are not only as effective at cleaning as traditional products, but are also more cost effective when evaluated over the length of the maintenance cycle.

THE PRO-LINK GREEN PROGRAM

Pro-Link Green is made up of four key components:

- **Assessment:** First, we'll understand the needs of your facility, and any special requirements of the building occupants - such as small children, pregnant women and those with health conditions.
- **Advice:** We'll determine a green cleaning program that makes sense based on your needs.
- **Training:** Proper training of your staff is critical to ensure a successful implementation - and we can help with this too.
- **Products:** A full spectrum of products for every part of your operation - chemicals and cleaners, paper, equipment, entrance mats, microfiber systems, can liners and other tools and supplies.

- Microfiber System
- Aerosols/Air Care
- Automatic Faucets & Flush Valves
- Biobased Products
- Buckets & Wringers
- Cleaning Chemicals (Carpet, Floor, Restroom)
- Dilution Control System & Cleaners
- Floor Finish/Stripper
- Liners
- Matting
- Microfiber Cloths & Dusters
- Microfiber Mops
- Mops
- Pads
- Paper & Dispensers
- Recycling Containers
- Sanitizers (Hand & Wipes)
- Soaps & Dispensers
- Transport Cleaning System
- Vacuum Bags & Panel Filters

THE BENEFITS OF THE PRO-LINK APPROACH TO GREEN CLEANING ARE NUMEROUS:

- Improve productivity and morale of building occupants
- Improve the health of the cleaning staff and building occupants, helping to reduce sick days
- Gain recognition in your community for reducing resource usage and pollution
- Reduce liability from worker safety issues
- Earn points towards LEED certification
- Create satisfaction for yourself, the cleaning staff and the building's occupants because you are helping to make your facility and your community a better place
- Simplify your purchasing function by getting all your green cleaning supplies from one source

RE-THINKING CLEAN

Pro-Link has been committed to helping our customers keep things clean since 1984. And today, clean means clean, shiny, germ-free, plus being green! And being green means safer to use, healthier for building inhabitants, better for the environment and cost competitive.

A. Dispensers

Paramount offers touch-free and manual systems to meet any facility's needs. Select the size option that offers optimal use in your environment: the high-capacity dispensers accommodate fewer change-outs in high traffic areas while the small footprint dispensers fit compact spaces. At-a-glance refill status monitoring is easy with the dispensers' large sight window. FlexLock adds the ability to convert to a locking or non-locking cabinet by removing the key inside - whenever you want. All dispensers are ADA compliant.

Are you washing your hands with germs?

Open, refillable bulk soap dispensers can put your business at risk.

A study[1] conducted by the University of Arizona under the direction of microbiologist Dr. Charles P. Gerba showed:

25% of refillable bulk soap dispensers contained unsafe levels of bacterial contamination.

16% of the samples contained coliforms, illness-causing fecal-based organisms.

Choose Pro-Link's factory sealed soaps to help stop spreading germs.

Green Seal™ Certified Pro-Link Green Elite products are among the most environmentally preferable towel and tissue lines available in the away-from-home market.

Property managers and government agencies are seeking to incorporate environmental considerations into their buying decisions. Simply stated, they want a healthier environment for their tenants, citizens, and employees.

Pro-Link products can help all types of facilities achieve their environmental policies for green or sustainable cleaning. We offer a complete line of Green Seal™ certified roll towels and bath tissue to meet any towel and tissue requirements. And all exceed the EPA's guidelines with a minimum 50% post-consumer waste for towels and 25% post-consumer waste for tissue.

With Pro-Link, facility managers also have a choice when going green - a choice of paper grades to meet user needs in all areas of a facility. Our towel and tissue products are available in "standard" recycled paper and in UltraWhite: the brightest, whitest grade with a plush, textured, cloth-like feel and extra absorbency.

Pro-Link's Green Seal™ Certified towel and tissue products are made of:

A. UltraWhite Green Certified Towels & Tissue*

UltraWhite offers exceptional brightness and absorbency.

Roll and multifold towels feature a unique weave pattern for high absorbency so fewer are needed per hand dry. This helps reduce waste and thus, recurring operating costs. Roll towels are available in 450', 800', and 1,000' lengths to meet any facility's needs. The 1000' length roll towels are ideal for facilities seeking high-capacity toweling.

Bath tissue features a floral emboss pattern for added softness. The UltraWhite bath tissue with bonding technology offers exceptional plushness and softness for the most discerning users. UltraWhite 2-ply bath tissue is ideal for facilities seeking absorbency, with a lower cost.

UltraWhite towels and tissue are available for use in Pro-Link's Elite Dispensing Systems, as well as Pro-Link standard dispensers. Elite bath tissue features a patented two-part core to ensure full use of each roll in the dispenser before advancing to the next roll. This patented technology also offers more than a 25% reduction in core material for a more environmentally preferable packaging. Elite roll towels, when combined with Elite dispensing systems, reduce maintenance time and costs.

B. Towel & Tissue Dispensing Systems

Pro-Link dispensers provide an elegant, coordinated washroom appearance in a black translucent finish.

Choose from our Elite System Dispensers that reduce product waste and maintenance time, or from our traditional, standard dispensers.

Elite touch free dispensers reduce the risk of cross-contamination, keeping your facility's tenants healthier. All roll towel dispensers (except the Compact) also offer a unique stub-roll feature: load a new roll towel behind the roll towel in use to ensure towels are always available for your tenants and visitors. Pro-Link's Elite tissue dispensers ensure the full use of the Elite tissue before advancing to the next roll, reducing waste and eliminating unsightly stub rolls.

Pro-Link Elite dispensers are available in five translucent colors: Blue, Green, Red, Yellow, and White. All Elite dispensers support the principles of HACCP as an important preventative measure in avoiding cross-contamination of food products, as is not required to touch these dispensers for use. They are also ADA Title III compliant when installed according to ADA guidelines.

Pro-Link also offers standard dispensers for the economical choice for roll and centerpull towels, as well as jumbo roll or 9" tissue dispensing. Available in black for use with Pro-Link's standard green certified towel and tissue products. We offer an innovative, high capacity electronic touch free towel dispenser in glossy black. This dispenser holds two full 8" towel rolls, and selectable dispensing modes of valet or motion.

Your Buying Decisions Can Impact the Environment

Using paper that is not Green certified or made of recycled content costs more than you think! It means more mature trees are cut down annually, more limited resources (fresh water and oil) are used to make the product, more energy is consumed in the product's production, as well as air pollutants entering our skies.

Using Pro-Link's Green certified tissue and towel products eliminates all of these environmental costs.

A. Toilet Tissue, Single & Jumbo Rolls

Pro-Link universal tissue is 100% recycled and exceeds EPA's minimum for post-consumer content.

HAND HYGIENE: Paper Towels vs. Air Dryers

Using paper towels after washing hands reduces the amount of bacteria on palms and fingertips by up to 77%. Air dryers are capable of blowing bacteria and potentially contaminating the washroom up to nine inches away (up to six feet away if operating at speeds of 400 mph or greater).

B. Roll & Centerpull Towels

DiffuseAire System

Radiant System

A. Environmentally Preferred Continuous Air Systems

Pro-Link offers three models for facilities desiring an environmentally friendly solution: DiffuseAire, Radiant and Radiant Power. All offer continuous 24 hour operation providing up to 60 days of fragrance. Units with fans help circulate the fragrance in areas with limited air flow. No propellants or added VOCs.

DiffuseAire

DiffuseAire is designed to simplify service and use, keeping maintenance personnel safer with its top-hinging cover. The optional fan module can be field installed. Refills are entirely recyclable, eliminating the need for special disposal procedures. They also fit most other continuous air dispensers. A no fragrance refill, Free, is available. It also neutralizes odors. This combination makes it ideal for use in hospitals and nursing homes.

DILUTION RATIOS

Chemicals must be properly diluted to work effectively. What does it mean if the ratio is 1:4? It means that 32 ounces of concentrate should be mixed with one gallon of water (there are 128 ounces in a gallon). **"1:4"** is another way of saying **"32:128"**.

Some typical ratios are listed below:

Ratio	Chemical Amount	Water Amount
1:4	32 ounces	128 ounces (1 gallon)
1:5	26 ounces	128 ounces (1 gallon)
1:8	16 ounces	128 ounces (1 gallon)
1:10	13 ounces	128 ounces (1 gallon)
1:12	11 ounces	128 ounces (1 gallon)
1:20	6.5 ounces	128 ounces (1 gallon)
1:32	4 ounces	128 ounces (1 gallon)
1:64	2 ounces	128 ounces (1 gallon)
1:128	1 ounce	128 ounces (1 gallon)

CONVERSION CHART

1 Gallon	=	128 Ounces
1 Quart	=	32 Ounces
1 Pint	=	16 Ounces
1 Cup	=	8 Ounces
1 Ounce	=	1/8 Cup
2 Cups	=	1 Pint
2 Pints	=	1 Quart
4 Quarts	=	1 Gallon

NOTE: When mixing cleaners, you may find it helpful to fill your container with the proper amount of water, then add the concentrate and thoroughly mix the solution. If you add the water to the concentrate, you may create a large amount of foam. By adding the concentrate to the water, the amount of foaming from the concentrate is minimized.

Using Pro-Link's ChemiCenter Dilution Control Systems ensures the accurate dilution.

PRO-LINK CHEMICENTER™ DILUTION CONTROL SYSTEM

An integral part for any sustainable green cleaning program, offering a solution for any dilution control need - customized to your facility's space constraints, areas and product needs. Choose from two wall mounted filling stations or the portable system based on your facility's needs. Pro-Link's ChemiCenter Dilution Control System is versatile, simple and safe.

This innovative system automatically dilutes each product to the proper dilution for your cleaning application, eliminating user error. The TrueTech™ feature of the wall mounted systems takes water pressure worries out of the cleaning equation, ensuring you are always cleaning with accurately diluted chemicals. All offer quick and easy bottle and bucket fills at the beginning of a shift, with an optional locking enclosure for securely storing the chemicals for the wall mounted units. The ChemiCenter Dilution Control System is easy to use, controls cost by reducing waste and over-use of cleaning chemicals and it minimizes chemical contact for the cleaning staff.

CONCENTRATED PRODUCTS THAT WORK THE FIRST TIME, EVERY TIME.

Pro-Link offers a full breadth of concentrated cleaning solutions for use with the ChemiCenter Dilution Control System. Each 1/2 gallon bottle has its own dilution tip to automatically dispense the correct ratio of chemical to water for the perfect cleaning solution every time, all the time. This "self-proportioning" system also reduces maintenance, as systems remain clog-free.

Pro-Link's concentrated products are specifically designed to increase productivity and reduce labor costs. They work the first time, every time. We offer a full line of products, including Green Certified cleaners, to meet your facility's needs. All are offered in half-gallon bottles, which can be used in any of our three dilution systems. These products are designed to be versatile, simple and safe.

Pro-Link's Green Certified products provide safe and effective cleaning solutions for all your daily cleaning needs. Green Certified chemicals are safer for the user and for the environment, meeting strict criteria from UL Laboratories (formerly EcoLogo®) - just look for the UL logo to quickly identify green products.

Escalators represent the largest single area of visible space in most facilities, aside from floors, walls and ceilings.

Dirt, grease, oil, and liquids collect on both the horizontal and vertical surfaces of the escalator steps. Without appropriate cleaning, this can be a safety hazard and can tarnish your image. Do not communicate a lack of upkeep and safety to your facilities' patrons.

The Escalator Cleaning Company will deep clean your escalators and in the process:

- Improve your property image
- Reduce liability from slippage accidents
- Minimize escalator downtime and customer inconvenience
- Extend the life of your escalators by preventing corrosion

The machines used deep clean by safely and gently removing dirt and grease from both the vertical and horizontal surfaces – without damaging the escalator's paint or surface. Their proven cleaning process, done on site, is safe, efficient and has been approved by all four major escalator manufacturers.

ESCALATOR CLEANING COMPANY

MACHINE SERVICE & REPAIRS

Anybody who owns a piece of cleaning equipment - even if it's only a vacuum - knows that it will require some repairs or programmed maintenance. When you need help with your equipment, call us at the location listed on the back cover. You'll get the service you need from our friendly and local machine service experts.

Cost Control:

We service what they sell, and are experts in repairing and maintaining powered cleaning equipment. You can improve productivity, control costs and lengthen the life of your equipment by working with us.

Professionally Trained Technicians:

All of our equipment service technicians have been professionally trained and are specialists in maintaining and repairing powered cleaning equipment. Our machine technicians are able to work on most nationally branded machines.

Programmed Maintenance:

When cleaning equipment breaks down, it costs time and money. Parts and labor are a direct expense, workers often are idle, overtime expenses can be incurred and cleaning schedules are jeopardized.

That's why it's important to regularly maintain your equipment. We can work with you to set up a programmed maintenance program.

On-Location Repairs:

We are equipped to make repairs at your facility for certain sized powered cleaning equipment and for some preventative maintenance contracts. In some cases, we will pick up and deliver machines for off-site repair.

Value-Added Services:

We offer various services for cleaning equipment. Contact us for information on rental equipment, centralized service records, planned maintenance packages and emergency service options.

WHAT TO CONSIDER WHEN CHOOSING A MAT

When considering what type of mat to buy there are two main criteria:

- What type of traffic area do you have?
- What type of area is it going in?

Identifying the proper mat will assure the perfect mat in any location.

TYPE OF TRAFFIC

Light Traffic Under 250 foot traffic per day	**Light-Medium Traffic** Between 250 & 3,000 foot traffic per day	**Medium-Heavy Traffic** Up to 5,000 foot traffic per day	**Heavy Traffic** Over 5,000 foot traffic per day
Small Business	Office Building	Convenience Store	University
Boutiques	Small Retail Store	Restaurant	Airport
Side Entrance	Bank/Postal Service	Hotel	Hospital
Etc...	Etc...	Etc...	Etc...

Many of our mats have recycled content that reduces the amount of non-renewable resources from entering landfills, thus preserving our natural resources.

TYPE OF AREA

Dry Areas	Wet Areas	Wet & Oily Areas
Pharmacy Counters	Cafeterias	Machine Shops
Assembly Lines	Bars	Kitchens
Work Stations	Walk-In Freezers	Garage Work Stations
Cashier Stations	Showers	Cook Lines
Packaging Areas	Dishwashing Areas	Oil Changing Pits
Etc...	Etc...	Etc...

Dry Areas: This type of environment allows the use of supple mats like PVC foam, which provide excellent support against muscular fatigue. Example: Foam Anti-Fatigue Mat

Wet Areas: Require the use of matting with a drainage system to allow the fluid to evacuate and prevent the risk of falls. Example: Commercial Clean Machine

Wet & Oily Areas: Require very durable mats with an efficient drainage system. Mats made of quality materials such as nitrile, which is resistant to many greasy products. Example: Wet/Dry Plus Mat

RECYCLED, INDOOR/OUTDOOR

Matting Helps Keep The Building Green By:

1. Stopping soil and water at the entrance.
2. Containing soil and water for removal at a convenient time.
3. Minimizing tracking of contained soil and water into the building.
4. Providing a safe surface for traffic.

*The U.S. Green Building Council's LEED rating system includes the use & maintenance of entrance systems and mats that prevent particles from entering the building. Recommendations include **a minimum of 10-15 ft. of quality matting products at entrances** to prevent contaminants from entering a building.*

Help us preserve the environment!
EcoPlus and EcoStep surfaces are made from 100% recycled post-consumer products. This means less bottles and tires will enter landfills.

CHOOSING THE RIGHT LINER...

By choosing the right liner for an application you will ensure the job is done right, minimize your labor cost and reduce what you spend on liners.

ThickSkins RECYCLED

A. ThickSkins™ Recycled Liners

When you need an affordable, heavy weight and environmentally responsible liner, choose Pro-Link ThickSkins Recycled liners. Made from top quality post-consumer resin (PCR - made from plastic bottles) and internally recycled virgin resin, these liners provide high performance at a lower cost. Their post-consumer content meets or exceeds the EPA's guideline, which makes them eligible for LEED credits. ThickSkins Recycled contain up to 80% recycled content and are available in coreless rolls to reduce waste.

Environmental Concerns

Help reduce the amount of plastic used, and ultimately thrown away, by selecting the right size and gauge of liner for the job or by using liners with recycled content, such as our ThickSkins™ Recycled liners.

The right size liner is important for environmental reasons as well as for performance and costs savings:
- A liner that is too large wastes plastic and your budget
- A liner that is too small increases labor costs

Gauge, the thickness of the liner, is also a key aspect to an environmentally sound program:
- A liner that is too thick for the application wastes plastic - not to mention money
- One too thin increases the risk of bag failure and can lead to unnecessary double bagging

The Right Bag for the Right Application

Type of Resin Material
Select the right type based on the application and the kind of trash being put into the bag. Using the right type of liner will provide the best results at the lowest cost.

High-Density
High-density liners are the most widely used and are typically the most cost-effective option due to the strength of high-density resin. High-density liners also provide an excellent moisture and vapor barrier. They are perfect for heavy garbage that does not have sharp edges.

Linear Low-Density
Provides maximum puncture and tear resistance. Ideally suited for trash with sharp or jagged edges. These bags will stretch before they break!

Calculating the Right Size

- Bag width should be 1/2 of the outer circumference of the container.
- Bag length should be the height of the container + 1/2 of the diameter of the container bottom + 3 inches for overhang. For rectangular containers, use 1/2 of the diagonal measurement.

Down-Gauging

If you convert from a linear low to a high-density liner, a significantly thinner gauge can be used because of the strength of high-density.

- If the liner is 33" or less in width, down-gauge by 50%.
- If the liner is greater than 33" in width, down-gauge by 35%.
- To convert the MIL to MIC, multiply by 25.4.
